## Professional Summary

High-performing Computer Science graduate (**GPA: 4.81/5.00**) with hands-on experience delivering data-driven, automation, and user-focused digital solutions in both large enterprise and product-driven environments, including **Saudi Aramco** and the **Apple Developer Academy**. Demonstrated ability to streamline reporting processes, improve data reliability, and support management decision-making through analytics, automation, and clear communication. Strong interest in **digital transformation**.

## Education

- Bachelor of Computer Science** - King Khalid University *June 2025*  
GPA: **4.81 / 5.00** (First Class Honors)
- Apple Developer Academy – TUWAIQ** | iOS Development Program *Aug 2025 - Present*

## Work Experience

**Saudi Binladin Group (SBG) King Fahd Sports City Stadium – Data Analyst** *Feb 2026 – Present*

**Workflow Automation:** Designed and deployed Power Automate flows to process Aconex notifications, replacing manual document logging and improving processing efficiency through automated tracking dashboards, reducing processing time by 70%

**Data Extraction & Transformation:** Developed parsing logic to extract structured fields from semi-structured HTML email data and transform them into validated datasets for automated tracking.

**Data Cleaning & Visualization:** Applied Python-based data cleaning and normalization techniques to prepare datasets for analysis, and built interactive Power BI dashboards to monitor workflow status, document revisions, and review outcomes.

**Saudi Aramco - Data Analyst Intern**

*Mar 2023 - May 2023*

- Reporting Automation:** Automated a weekly Power BI dashboard using UiPath, replacing a manual process of collecting Excel files from multiple departments and consolidating data for reporting.
- Stakeholder Communication:** Developed clear presentations and digital materials summarizing departmental scope and key metrics, used in senior management meetings and external visits.

## Selected Projects

**PediDermScan - Pediatric Skin Disease Detection**

*May 2025*

- Problem Definition & Identification:** Built a free, web-based diagnostic support tool focused on identifying common pediatric skin conditions from images, helping parents and caregivers recognize potential conditions early.
- Analytical Leadership:** Led development and training of a deep learning model recognizing nine skin diseases, achieving **~90% accuracy**.
- End-to-End Delivery:** Owned the full ML pipeline, database design (SQL), and security implementation, including encryption of sensitive user data.

**Haik - iOS Application - Apple Developer Academy - TUWAIQ**

*Jan 2026*

- Personalized Recommendation System:** Developed a location-based iOS application that generates neighborhood recommendations based on user-defined lifestyle preferences using custom scoring logic.
- Algorithm Design & Data Modeling:** Designed a weighted matching algorithm to rank neighborhoods dynamically, structuring input variables and normalizing preference scores for accurate recommendations.

## Certificates

- RPA Citizen Developer Foundation Training | **UiPath Academy**
- Data Platform Foundations Associate, OCI AI Foundations Associate, OCI Foundations Associate | **Oracle**

## Skills

**Data Analysis & Visualization:** Power BI, Excel, SQL, Python

**Automation:** UiPath StudioX (RPA), Power Automate

**Application Development:** Swift (iOS), HTML, CSS, JavaScript

**Professional:** Structured problem solving, communication, teamwork, leadership, critical thinking

## Languages

Arabic - Native | English - Fluent (STEP: 94 | TOEFL iBT equiv. 550)
